Went to the Waynesboro area to get a trout fix and had some luck, plenty of Chubs in all sizes and several Brownies, took one picture, not huge, found him in the farthest down stream wade only section of the managed waters, he liked a hare's ear gold bead head nymph.

At the last meeting there was some discussion about trout stocking and in which rivers, I went to one of those rivers today the Upper South just outside of Waynesboro and had some good results. I fished for about three hours landed a mix of Rainbows and Brownies, used a nymph throughout didn't see any fish rising. The fish pictured is the median size of the trout caught.

Made the trek to Waynesboro on Veteran's Day, used a Hare's ear and when that got slow switched to a pheasant tail nymph. Fished the 3 hours just before sunset, plenty of Fall Fish and a good number of Rainbows and Browns mixed in. Rainbow pictured was one of the smaller ones on the day.

Got a few hours in Sunday afternoon, water level was high from recent rains but clear, fished heavy nymphs with some success, several trout and twice as many fall fish.

Another good day on the Upper South just outside Waynesboro, Scott and I used mostly nymphs and some dry flies to land a mixed bag of Rainbows, Brookies, Browns and an assortment of other species. A considerable down pour didn't slow the action or reduce the clarity of the water.

Took a post retirement trip to Montana and Yellowstone to go after Rainbows, Browns and Cut Throats. Great fishing in very scenic places, fished the Big Horn and Madison Rivers and Slough Creek. The Cut Throat was out of Slough Creek in Yellowstone, the Rainbow was from the Big Horn and I'm sitting in the Madison River. Tight Lines, Gary

AP Hill's 2013 trout season started at the beginning of December, this is earlier than the previous few years which didn't start until mid January. The regulations are also different from last year, no season trout permit, you pay by the day, they are stocking one pond vice two. Any type of fishing is allowed, there's plenty of open shoreline to swing a fly line, the season will go until 30 April. More info at AP Hill's outdoor rec: 804 633-8244.

Caught about 15 brookies in about 4 hours. All on top with parachute Adams. Burt got 21 (by actual count), most on top with Mr. Rapadan. Water was a little high but about normal for this time of year.</p>

Caught 4 browns including an old 15" hooked jawed one plus a 13". SNP trout do not get much better. Did not catch a single brookie. A guy who fished much higher (upstream) caught about 30 brookies plus at least one 13" brown.</p>

Caught about 20 brookies in 4 hours of fishing and 2 hours of walking. That hill gets steeper and longer every year. All were caught on top mostly with a #14 elk-hair caddis. They were all nice fish for mountain brookies. Had one 10" plus a couple of 9's.</p> <p>Only other fishing has been 30 min of throwing 4" plastic lizzard several times a week into the swm/landscape ponds which are 2 min from the house. There, I continue to get bit by little bass ranging from 5" to 13". Catch a few lose more.</p>

Caught almost 3 dozen brookies, all on top water. Best fly seemed to be #14 parachute Adams. There was a wide variety of bugs on the water. At least 3 different may flies. some caddis, Yellow Sallies, midges, etc. Stream was running full. A little less water might have fished better. Road was a little rutted but solid. Need to be careful with any vehicle not having a good under clearance.</p>

Water a little low but not bad. Caught a dozen maybe a couple of more. All were on dries. A beetle and a #14 elk-hair caddis fished about the same. All were nice size brookies( for wild SNP brookies.)</p>
