This is the box I showed off at the October club meeting.</p> <p>https://www.flambeaucases.com/index.php ... ls/6775TXR</p> <p>Here is the site I found with the instructions on how to build it. http://azwandering.com/diy-boat-fly-box/</p> <p>I bought four of these boxes and the 6mm foam to build these boat boxes for less then the cost of an identical box from a big box outfitter including the shipping.</p> <p>Craig Conover</p>

<p>Chris K</p> <p>offline</p> <p>Joined: Thu Mar 17, 2011 1:17 pm Posts: 38</p>	<p>Post subject: Bass worm experiment 📅 Posted: Fri Aug 05, 2011 6:34 pm</p> <p>I dedcided to try to tie some bass worms. So, I went to hooby lobby looking for some big yarn. I settled on something called "double boucle" . To make the tails nice and thick I twisted the yarn together. to make the bodies I just wrapped the yarn around the hook.</p> <p>The flies below are 3/0 worm hooks and are about 6" long. The top one has lead eyes, middle one is lead wire and the bottom one is bare hook. Out of all of them I like the bare hook the best. in the 5 gallon bucket test the sink rate was about 6" per second which is good for a worm. The other 2 sank too fast for a pond but might be good in the Rapp for smallies.</p> <p>Some improvements I might make if these work OK are add a weedgaurd and maybe a paddle tail. Since the fly has almost no action as it sinks.</p> <p>Attachments:</p> <div data-bbox="326 711 1039 1245"></div> <p>IMG_0242.JPG [26.82 KIB Viewed 2287 times]</p>
